

Your views on reducing the number of roads we grit in winter

Before you begin

Some of the things in this paper are not easy to understand. You may need some help from someone to read it.

We need to save money

Norfolk County Council plays a large part in people's lives. We spend over a billion pounds each year on services.

We are facing some big challenges. Our population is growing, people are living longer and people need different services.

Things are becoming more expensive and the amount of money we have coming in isn't keeping up.

Saving money each year

The amount of money we get from the government is going down.

We also get money from people who live in Norfolk. This is called council tax. We use this money to pay for peoples services.

We are asking people to pay more council tax but the money we get back won't be enough to pay for all our services.

This means we have to save money each year.

We have already saved lots of money

We have asked people in Norfolk about their ideas to save money. We have saved £344 million since 2011. That is a lot of money.

What do we need to do now?

Things have changed since last year. We now have to save more money. We need to save £125 million by 2021.

We must find more ways to save money.

We have to make some difficult choices about how we spend our money.

We want to know what you think

In winter we grit the roads so people can use them safely when there is snow and ice.

We can't grit all of the roads as it would take too much time and cost too much money.

We grit busy roads and roads that lots of people use.

Our idea to save money is to grit fewer roads.

If our idea went ahead we could save £200,000 next year.

We will make sure that all towns and villages that have a road gritted at the moment will still have one.

We want to know what you think about our plans to reduce the number of roads we grit in winter
