

Proposed walking and cycling improvements on Church Lane

© Crown Copyright and database right 2025 Ordnance Survey 100019747.

The plan is an aerial view of a street map with buildings showing the proposed improvements for walking and cycling on Church Road. This drawing shows, from right to left, the section of Church Road from its junction with Middleton Road heading eastwards towards its junction with Spencer Avenue.

The drawing shows the proposals A- D:

Proposal A shows the footway widened to create a shared use pavement (for walking and cycling) from the northern end of Middleton Rd, following the line of the existing southern footway of Church Lane, stopping to the west of East Norfolk Sixth Form College, opposite Spencer Avenue. The carriageway width would be reduced to a minimum of 6 metres but all on street parking would remain.

Proposal B shows the replacement of 2 uncontrolled crossing points on Church Lane with 2 new zebra crossings. These are located at the west end near the junction with Middleton Road and to the east end next to the bus stop and skatepark.

Proposal C shows a continuous footway across the junction of Bailol Road and at the entrance to the car park of East Norfolk Sixth Form College.

Proposal D shows a new parallel crossing at northern end of Middleton Road close to its junction with the roundabout.
